AXIS P3827-PVE Panoramic Camera
True to life, 180° coverage, no blind spots

With 7 MP resolution and seamless stitching of all four images, this multisensor camera offers complete coverage and excellent image quality with incredible details up to 30 fps. It delivers 180° horizontal and 90° vertical coverage with no blind spots. Plus, it’s possible to mount two cameras back-to-back for a complete 360° overview. Including horizon straightening, this product will give an excellent viewing experience, enabling to set the horizon in the image. Built on ARTPEC-8, this cost-effective camera supports advanced analytics based on deep learning on the edge. Additionally, built-in cybersecurity features prevent unauthorized access and safeguard your system.

> 7 MP multisensor camera with one IP address
> 180° horizontal, 90° vertical coverage
> Seamlessly stitched realistic images
> Support for advanced analytics
> Horizon straightening
AXIS P3827-PVE Panoramic Camera

**System on chip (SoC)**

- Model: ARTPEC-8
- Memory: 2048 MB RAM, 8192 MB Flash
- Compute capabilities: Deep learning processing unit (DLPU)

**Video**

- Compression: H.264 (MPEG-4 Part 10/AVC) Baseline, Main and High Profiles H.265 (MPEG-H Part 2/HEVC) Main Profile Motion JPEG
- Resolution: 3712x1856 to 640x320
- Frame rate: Up to 25/30 fps (50/60 Hz) in all resolutions
- Video streaming: Up to 20 unique and configurable video streams³
- Axis Zipstream technology in H.264 and H.265
- Controlable frame rate and bandwidth
- VBR/ABR/MBR
- Low latency mode
- Video streaming indicator
- Signal-to-noise ratio: >55 dB
- WDR: Forensic WDR: Up to 120 dB depending on scene
- Multi-view streaming: Up to 8 individually cropped out view areas
- Noise reduction: Spatial filter (2D noise reduction)
- Temporal filter (3D noise reduction)
- Image settings: Horizon straightening, saturation, contrast, brightness, sharpness, white balance, day/night threshold, local contrast, tone mapping, exposure mode, compression, dynamic text and image overlay, polygon privacy masks
- Image processing: Axis Zipstream, Forensic WDR, Lightfinder
- Pan/Tilt/Zoom: Digital PTZ

**Audio**

- Audio features: AGC automatic gain control, Network speaker pairing
- Audio streaming: Configurable duplex: One-way (simplex, half duplex) Two-way (half duplex, full duplex)
- Audio input: Input for external unbalanced microphone, optional 5 V microphone power, Digital input, optional 12 V ring power, Unbalanced line input
- Audio output: Output via network speaker pairing
- Audio encoding: 24bit LPCM, AAC-LC 8/16/32/48 kHz, G.711 PCM 8 kHz, G.726 ADPCM 8 kHz, Opus 8/16/48 kHz

**Network**

- Protocols: IPv4, IPv6 USIPv6, ICMPv4/ICMPv6, HTTP, HTTPS³, HTTP/2, TLS³, IPv6/IPv4/ICMPv6, HTTP, HTTPS³, HTTP/2, TLS³, IPv6, DoS Layer 3 DiffServ, FTP, STFP, CIFS/SMB, SMTP, mDNS (Bonjour), UoPv³, SNMP v1/v2c/v3 (MIB-II), DNS/DNSv6, DDNS, NTP, NTS, RTP, RTF, STFP, TCP, UDP, ICMPv4/v1/v2/v3, RTCP, ICMP, DHCPv4/6, ARP, SSH, LLDP, DTP, MQTT v3.1.1, Secure syslog (RFC 3164/5424, UDP/TCP/TLs), Link-Local address (ZeroConf), IEEE 802.1X (EAP-TLS), IEEE 802.1AR

**System integration**

- Application Programming Interface: Open API for software integration, including VAPIX³, metadata and AXIS Camera Application Platform (ACP); specifications at axis.com/developer-community.
- Video management systems: Compatible with AXIS Companion, AXIS Camera Station, video management software from Axis’ Application Development Partners available at axis.com/vms
- Onscreen controls: Privacy masks
- Event conditions: Device status: above operating temperature, above or below operating temperature, below operating temperature, within operating temperature, IP address removed, new IP address, network lost, system ready, ring power overcurrent protection, live stream active, casing open
- Event actions: Audio clips: play, stop
- Built-in installation aids: Pixel counter, level grid

**Analytics**

AXIS Object Analytics

- Object classes: humans, vehicles (types: cars, buses, trucks, bikes)
- Scenarios: line crossing, object in area, crossline counting
- Metadata visualization with trajectories, color-coded bounding boxes and tables
- Polygon include/exclude areas
- Perspective configuration
- ONVIF Motion Alarm event

**Metadata**

- Object data: Classes: humans, faces, vehicles (types: cars, buses, trucks, bikes), license plates
- Attributes: Vehicle color, upper/lower clothing color, confidence, position
- Event data: Producer reference, scenarios, trigger conditions

**Applications**

- Included: AXIS Object Analytics, AXIS Video Motion Detection, active tampering alarm, audio detection
- Support for AXIS Camera Application Platform enabling installation of third-party applications, see axis.com/acap

**Approvals**

- Product markings: CSA, UL/cUL, BIS,UKCA, CE, KC, EAC, VCCI, RCM
- Supply chain: TAA compliant
- EMC: CISPR 35, CISPR 32 Class A, EN 55035, EN 55032 Class A, EN 50121-4, EN 61000-6-1, EN 61000-6-2, IEC 62236-4
- Australia/New Zealand: RCM AS/NZS CISPR 32 Class A Canada: IECES-3(A)/NMB-3(A)
- Japan: VCCI Class A Korea: KS C 9835, KS C 9832 Class A USA: FCC Part 15 Subpart B Class A

**Safety**

- IEC 60068-2-1, IEC 60068-2-2, IEC 60068-2-6, IEC 60068-2-14, IEC 60068-2-27, IEC 60068-2-78, IEC60529 IP66/IP67,
IEC/EN 62262 IK10, NEMA 250 Type 4X, NEMA TS 2 (2.2.7-2.2.9), MIL-STD-810H (Method 501.7, 502.7, 503.7, 506.6, 507.6, 509.7, 512.6)

Network

**NIST SP500-267**

**Cybersecurity**

**Edge security**

- **Software**: Signed firmware, brute force delay protection, digest authentication and/or OAUIth 2.0 RFC6749 OpenID Authorization Code Flow for centralized ADFS account management, password protection, AES-XTS-Plain64 256bit SD card encryption
- **Hardware**: Secure boot, Axis Edge Vault with Axis device ID, signed video, secure keystore (CC-EAL4++, FIPS 140-2 level 2 certified hardware protection of cryptographic operations and keys)

**Network security**

- **IEEE 802.1X** (EAP-TLS, PEAP-MSCHAPv2), IEEE 802.1AR, HTTPS/HSTS, TLS v1.2/v1.3, Network Time Security (NTS), X.509 Certificate PKI, IP address filtering

**Documentation**

- **AXIS Q5 Hardening Guide**
- **AXIS Q5 Security Development Model**
- **AXIS Q5 Software Bill of Material (SBOM)**

To download documents, go to axis.com/support/cybersecurity

**General**

**Casing**

- IP66/IP67; NEMA 4X- and IK10-rated aluminum casing
- Polycarbonate hard-coated dome
- Color: white NCS S 1002-B

For repainting instructions, go to the product’s support page. For information about the impact on warranty, go to axis.com/warranty-implication-when-repainting.

**Mounting**

- Mounting bracket with junction box holes (double-gang, single-gang, 4” square, and 4” octagon) and for wall or ceiling mount
- ¼” (M25) conduit side entries

**Power**

- Power over Ethernet (PoE) IEEE 802.3at Type 2 Class 4 Typical 12 W, max 18 W

**Connectors**

- **Network**: Shielded RJ45 10BASE-T/100BASE-TX/1000BASE-T PoE (ID: Terminal block for two configurable supervised inputs / digital outputs (12 V DC output, max load 50 mA)
- **Audio**: 3.5 mm analog/digital mic/line in

**Storage**

- Support for microSD/microSDHC/microSDXC card
- Recording to network-attached storage (NAS)
- For SD card and NAS recommendations see axis.com

**Operating conditions**

- -40°C to 55°C (-40°F to 131°F)
- Maximum temperature according to NEMA TS 2 (2.2.7): 74°C (165°F)
- Start-up temperature: -40°C

Humidity 10–100% RH (condensing)

**Storage conditions**

- -40°C to 65°C (-40°F to 149°F)
- Humidity 5–95% RH (non-condensing)

**Dimensions**

- Height: 169 mm (6.7 in)
- Width: 195 mm (7.7 in)
- Effective Projected Area (EPA): 0.025 m² (0.27 ft²)

**Weight**

- 2.3 kg (5.1 lb)

**Box content**

- Camera, installation guide, terminal block connector, connector guard, cable gaskets, owner authentication key

**Optional accessories**

- **AXIS T8415 Wireless Installation Tool**
- **AXIS Surveillance Cards**
- **AXIS TQ3102 Pendant Kit**
- **AXIS TQ3101-E Pendant Kit**
- **AXIS TQ3201-E Recessed Mount**

For more accessories, go to axis.com/products/axis-p3827-pve#accessories

**System tools**

- **AXIS Site Designer**, **AXIS Device Manager**, product selector, accessory selector, lens calculator

Available at axis.com

**Languages**

- English, German, French, Spanish, Italian, Russian, Simplified Chinese, Japanese, Korean, Portuguese, Polish, Traditional Chinese

**Warranty**

5-year warranty, see axis.com/warranty

**Part numbers**

Available at axis.com/products/axis-p3827-pve#part-numbers

**Sustainability**

**Substance control**

- PVC free, BFR/CFR free in accordance with JEDEC/JCA Standard JS709
- RoHS in accordance with EU RoHS Directive 2011/65/EU and EN 63000:2018
- REACH in accordance with (EC) No 1907/2006. For SCIP UUID, see axis.com/partner.

**Materials**

- Renewable carbon-based plastic content: 19% (biobased)
- Screened for conflict minerals in accordance with OECD guidelines

Axis Communications is a signatory of the UN Global Compact, read more at unglobalcompact.org

a. We recommend a maximum of 3 unique video streams for optimized user experience, network bandwidth, and storage utilization. A unique video stream can be served to many video clients in the network using multicast or unicast transport method via built-in stream reuse functionality.

b. This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (openssl.org), and cryptographic software written by Eric Young (eay@cryptsoft.com).
Key features and technologies

AXIS Object Analytics
AXIS Object Analytics is a preinstalled, multifeatured video analytics that detects and classifies humans, vehicles, and types of vehicles. Thanks to AI-based algorithms and behavioral conditions, it analyzes the scene and their spatial behavior within – all tailored to your specific needs. Scalable and edge-based, it requires minimum effort to set up and supports various scenarios running simultaneously.

Zipstream
The Axis Zipstream technology preserves all the important forensic in the video stream while lowering bandwidth and storage requirements by an average of 50%. Zipstream also includes three intelligent algorithms, which ensure that relevant forensic information is identified, recorded, and sent in full resolution and frame rate.

Forensic WDR
Axis cameras with wide dynamic range (WDR) technology make the difference between seeing important forensic details clearly and seeing nothing but a blur in challenging light conditions. The difference between the darkest and the brightest spots can spell trouble for image usability and clarity. Forensic WDR effectively reduces visible noise and artifacts to deliver video tuned for maximal forensic usability.

Horizon straightening
Horizon straightening is a feature in panoramic multisensor cameras that compensates for any physical tilt of the camera, thereby removing distortion and enabling the horizon to be straight even though it is not in the middle of the image. All objects and lines that are vertical in real life stay vertical also in the image.

Axis Edge Vault
Axis Edge Vault is the hardware-based cybersecurity platform that safeguards the Axis device. It forms the foundation that all secure operations depend on and offers features to protect the device’s identity, safeguard its integrity from factory and protect sensitive information from unauthorized access.

Establishing the root of trust starts at the device’s boot process. In Axis devices, the hardware-based mechanism secure boot verifies the operating system (AXIS OS) that the device is booting from. AXIS OS, in turn, is cryptographically signed (signed firmware) during the build process. Secure boot and signed firmware tie into each other and ensure that the firmware has not been tampered with during the lifecycle of the device and that the device only boots from authorized firmware. This creates an unbroken chain of cryptographically validated software for the chain of trust that all secure operations depend on.

From a security aspect, the secure keystore is the critical building-block for protecting cryptographic information used for secure communication (IEEE 802.1X, HTTPS, Axis device ID, access control keys etc..) against malicious extraction in the event of a security breach. The secure keystore is provided through a Common Criteria and/or FIPS 140 certified hardware-based cryptographic computing module. Depending on security requirements, an Axis device can have either one or multiple such modules, like a TPM 2.0 (Trusted Platform Module) or a secure element, and/or a system-on-chip (SoC) embedded Trusted Execution Environment (TEE).

Signed video ensures that video evidence can be verified as un tampered without proving the chain of custody of the video file. Each camera uses its unique video signing key, which is securely stored in the secure keystore, to add a signature into the video stream. This allows video to be traced back to the Axis camera from where it originated, so it’s possible to verify that the footage has not been tampered with after it left the camera.
